

First Meeting Notes

Started with a Youtube channel, talking about entrepreneurship and how to open an LLC.
Started getting a lot of questions regarding the process, the expenses, and documentation.
The process is complicated and different for each state.

Maria because the name is a popular Spanish name.

The co-pilot is already trained in the process of starting an LLC, with state-wise compliances.

There are 8 beta testers - some people still felt it was overwhelming. Even with the steps.
Wanted further guidance and support. She then came up with the idea of a web-based platform which helps Spanish speakers find the correct path for them to start their LLC.

3 different paths -

1. You are ready to get the LLC with the AI copilot
2. If you still feel overwhelmed, we can connect you to partners
3. If people need to learn more, the app provides educational resources.

AI - Need to discuss how much AI can be incorporated into the prototype. Can show her the idea.

Goal - Build a prototype of a web-based platform to present to developers and investors.

Demographics - Is it only restricted to Florida?

Let us start with 1 state first, then, if possible, expand. The workflow for just one state requires a lot of work.

Requirements - (tentative)

3 tabs with the different paths.

A dashboard which tracks the progress.

Does not like a face for the copilot

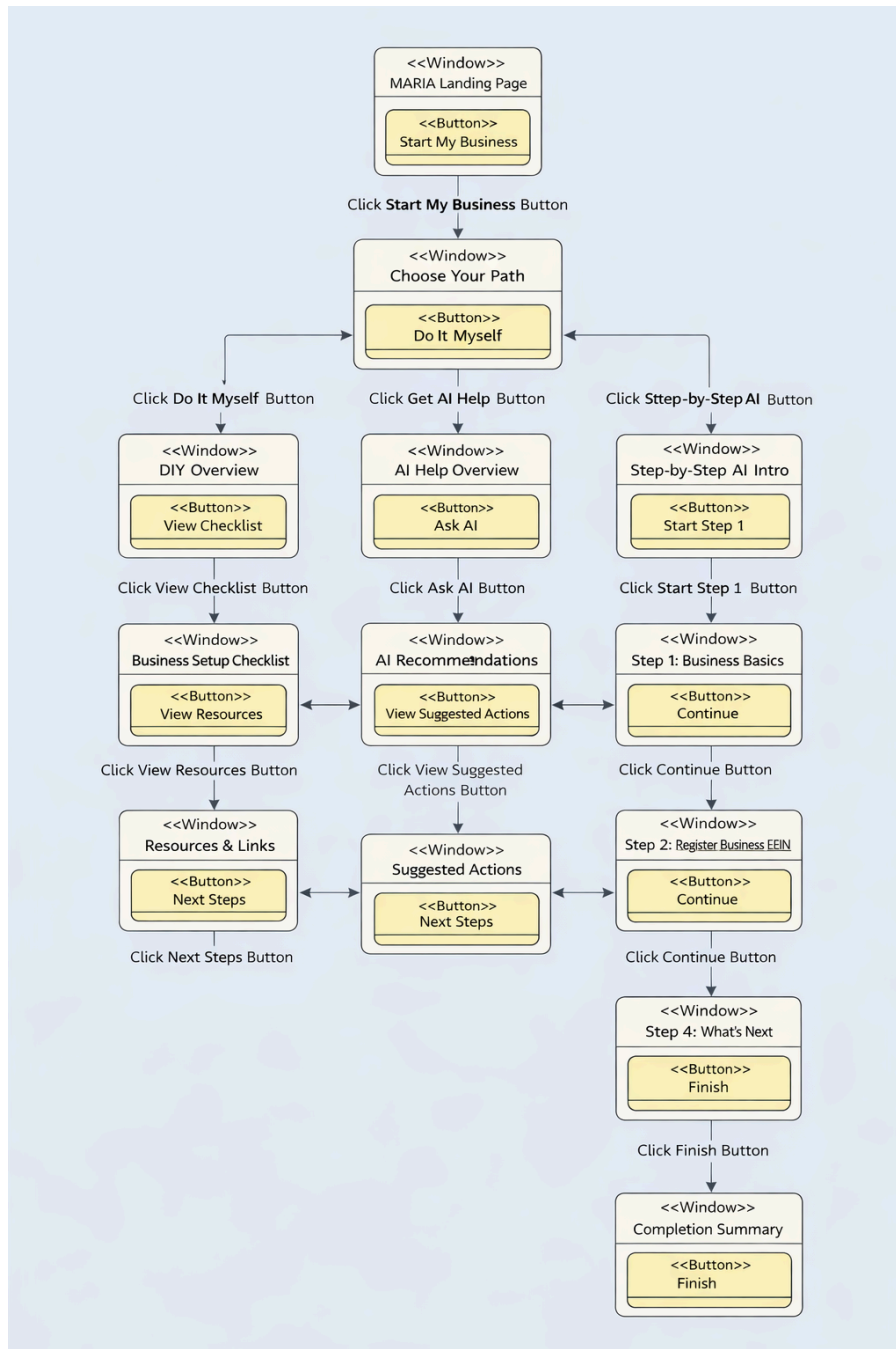

Reference companies - doula, LegalZoom

LegalZoom -

In a nutshell, visually, she would like the platform to be simple, very clear, does not overwhelm the user.

Brand Identity - Clean slate, no concrete idea for now. Green and white can be the colours for the brand.

The prototype - if it can be Spanish, that can be great.

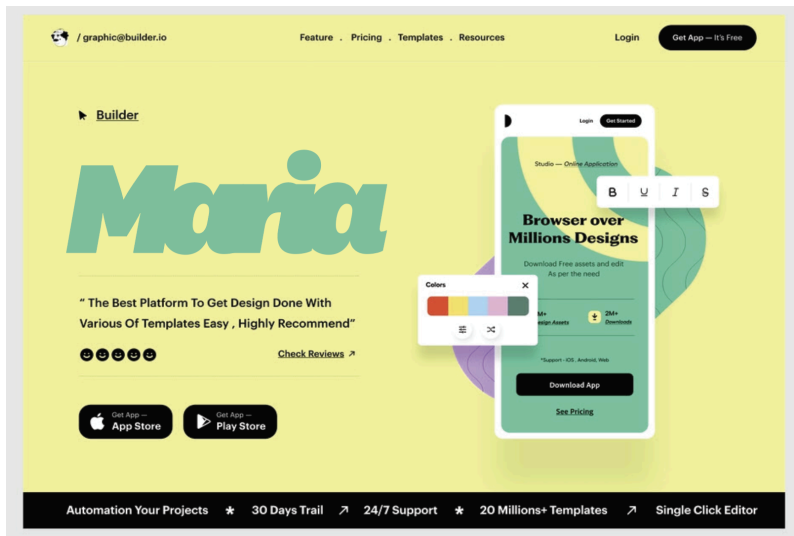

Add in:

- Design a user journey map (Focused, narrow view, often mapping a specific scenario, such as a user's workflow within a software application, designed for detailed UX improvements.)
- Customer journey map: Broad, holistic view covering all interactions, often including pre- and post-purchase (marketing, support, sales) to understand emotional stages and touchpoints.

Use figma templates and work on astah

Project MARIA

Kate Siavel, Founder and Content Creator

Technology needed / proposed:
Your choice but these are typical
Figma
FigJam
Miro

Existing Framework(s):

[MARIA copilot](#)
[Free Guide](#)
[Survey](#)
[YouTube Channel](#)

Context - MARIA is a digital assistant, AI-powered platform experience where users can either follow guidance or choose a “done-for-you” path through trusted partners. Business is in the MVP stage.

Primary goal - user journey map + 2–3 core user flows (onboarding → assessment → DIY vs. done-for-you decision → next steps), plus a clickable Figma prototype showing the key screens and information architecture for a future web app experience.

Interaction - users are Latino residents in the U.S. who are starting a business

Product Backlog

PRODUCT BACKLOG — PROJECT MARIA

Project: Project Maria

Product vision

Help **Latino entrepreneurs who want to start a business in the U.S.** understand and navigate the process through a clear, guided, and user-friendly digital experience.

DELIVERABLE 1 — USER JOURNEY MAP

Goal:

Understand real user experiences and define a clear end-to-end journey that reflects how Latino entrepreneurs think, feel, and make decisions when starting a business in the U.S.

Backlog Items

- Understand real user experiences
 - Identify key pain points and needs
 - Identify patterns and insights
 - Define the main stages of the user journey
 - Identify decision moments
 - Define 2–3 core user workflows
 - Map user actions, thoughts, and emotions
 - Identify opportunities for guidance and support
 - Create a visual User Journey Map
-

DELIVERABLE 2 — CLICKABLE PROTOTYPE (FIGMA)

Goal:

Translate the User Journey Map into a conceptual, clickable prototype that shows how the solution could support Latino entrepreneurs starting a business.

Backlog Items

- Select which journey stages will be prototyped
- Define the main user paths to include
- Define required screens for each path
- Create low-fidelity wireframes
- Apply basic visual direction and branding
- Build a clickable prototype in Figma

MVP SCOPE & CONSTRAINTS

- Prototype is **conceptual only** (no real logic)
- Final deliverable is **Figma only**
- Chatbot is **conceptual** (screens only)
- Content language: **Spanish**
- Scope limited to **one U.S. state**

BACKLOG MANAGEMENT NOTES

- The Product Backlog is a living document
- Items move from Product Backlog → Sprint Backlog during Sprint Planning
- Detail increases as the project progresses

Sprint Backlong Reference

Updated Sprint 1 Backlog

Goal: Prototype essential student-focused use cases and the moderate platform activity use case for safety.			
Name of Task to be Completed	Team Member(s) Assigned Primary Responsibility	Estimated Effort for the Task (XXS-XXL)	Actual Completion Time
Match with Peer prototype	Grace	M	1 hour
Match with Peer UC Descriptions	Grace	L	1 hour
Match with Peer Activity diagrams	Lucy	L	2 hours
User Manual Video (student use cases)	Jordan	L	45 minutes
User Manual Video (Admin)	Lucy	M	30 minutes
Manage Profile Prototype	Akaiya	M	2 hours
Make a Post Prototype	Jordan	M	1 hour
View Sessions Prototype	Yusur	M	2 hours
Schedule Session Prototype	Yusur	M	1 hour
Suggest Pairs Prototype	Yusur	M	1 hour
Moderate Platform Activity Prototype	Lucy	M	2.5 hours
View Analytics Prototype	Lucy	M	30 minutes
D5 Executive Summary	Yusur	S	30 minutes
Window Navigation Diagram	Akaiya	XL	1 hour
D5 Appendix of Team Member Contributions	All	XXS	10 minutes
Update Sprint Backlog with actual completion times	All	XXS	10 minutes
Compile and finalize deliverable for submission	All	XS	20 minutes

Updated Sprint 2 Backlog

Goal: Prototype "Should Have" use cases and finalize design of overall prototype.			
Name of Task to be Completed	Team Member(s) Assigned Primary Responsibility	Estimated Effort for the Task (XXS-XXL)	Actual Completion Time
Send Message Prototype	Grace, Yusur	M	1 hour
Leave Peer Review Prototype	Yusur	M	1 hour
Video User Manual (student)	Jordan	L	10 minutes
Network/Deployment Diagram	Lucy	L	1.5 hours
Cybersecurity Discussion	Grace	M	
Cost/Benefit Analysis	Akaiya	L	
Presentation Slides	All	XL	30 minutes
D6 Executive Summary	Jordan	S	30 minutes
D6 Appendix of Team Member Contributions	All	XXS	10 minutes
Update Sprint Backlog with actual completion times	All	XS	10 minutes
Compile and finalize deliverable for submission	All	M	20 minutes
Report User Prototype	Yusur & Jordan	S	15 minutes

Sprint Backlog

SPRINT BACKLOG — SPRINT 1

Project: Project Maria

Sprint: 1

Duration: 2 weeks

Sprint Goal

Build a solid foundation for the User Journey Map by understanding real user experiences and collaboratively defining the structure of the journey.

PRODUCT BACKLOG ITEMS INCLUDED

- Understand real user experiences
 - Identify patterns and insights
 - Define the main stages of the user journey
 - Identify key decision moments and paths
 - Create a first visual version of the User Journey Map
-

SPRINT BACKLOG — WORK AREAS & TASKS

♦ 1. Understand Real User Experiences

Tasks

- Define interview learning goals
- Draft interview questions
- Identify potential interviewees (Latino business owners)
- Prepare a short interview contact message
- Define interview format (duration, online or in-person)
- Conduct interviews
- Take structured notes from interviews

Outcome

- Real user input to inform the User Journey Map
-

♦ 2. Identify Patterns & Insights

Tasks

- Review and organize interview notes
- Group findings into themes
- Identify recurring pain points
- Identify main user needs
- Select key insights relevant to the journey

Outcome

- Clear insights that explain user behavior and needs
-

♦ 3. Define the Main Stages of the User Journey

Tasks

- List possible journey stages
- Discuss and validate stages as a team
- Agree on final journey stages
- Write short descriptions for each stage

Outcome

- Shared understanding of the user journey structure
-

♦ 4. Identify Decision Moments & Core Paths

Tasks

- Identify moments where users need to make decisions
- List possible paths or options at each decision point
- Define and name the main workflows
- Agree on 2–3 core workflows to keep

Outcome

- Clear decision points and core user paths
-

♦ 5. Visualize the User Journey Map

Tasks

- Create a User Journey Map template (FigJam / Figma)
- Populate the map with:
 - Stages
 - User actions
 - Thoughts
 - Feelings
 - Pain points
 - Opportunities
- Integrate insights from interviews
- Refine layout and readability

Outcome

- User Journey Map v1 (clear and presentable)
-

Sprint 1 Deliverables

- User Journey Map v1
- Interview insights summary
- Defined 2–3 core user workflows

February Schedule

PROJECT MARIA

February Team Calendar

Weekly Team Meetings

In-Person Team Meeting

Every Monday – 5:00 PM

Location: In person (on campus)

Virtual Stand-Up

Every Friday – 4:00 PM (15 minutes)

Format: Virtual (Zoom / Google Meet)

February 2026 Schedule

Week 1: Monday Feb 2 (5:00 PM) | Friday Feb 6 (4:00 PM)

Week 2: Monday Feb 9 (5:00 PM) | Friday Feb 13 (4:00 PM)

Week 3: Monday Feb 16 (5:00 PM) | Friday Feb 20 (4:00 PM)

Week 4: Monday Feb 23 (5:00 PM) | Friday Feb 27 (4:00 PM)

Class Time (Reference)

Tuesdays – 5:30 PM to 8:15 PM

Interview Resources

Interview pitch/Contact Message:

Hello my name is (Zion/ Addison) we're Kent State University students working on a project with Latina entrepreneur and Youtuber, Kate Siavel. She's the founder of a startup website called "Project MARIA" . It's here to help Latino immigrants in the US who wish to start their own business. We were hoping to gather your thoughts and experiences that you've had when obtaining your LLC and EIN that could've been better and things that you feel you wish you knew.

Tips:

- What was it like when you came to the US?
- Delve into personal experiences (convo starter)
- experiences when first starting the business not just LLC and EIN
- Agencies you may not have known about
- Are there things you still don't know?

Interview Questions:

Did you need to know the name of your business right away?

What was the biggest challenge with obtaining your LLC?

What did they tell you when you first started? Did that change later on?

Did you need additional documentation besides your proof of citizenship, and birth certificate?

Was there a language barrier? Did they accommodate that?

If you had a resource during the time of starting your business, what resource should it have been?

Did you pay a third-party to set up your LLC or did you do it yourself?

Were any of the websites you used confusing? Did you have problems? Was there help? What websites did you use?

Potential Interviewees:**El Malecon Mexican Grill:**

Contact:

(Phone)330-524-5568

(Email) info@elmaleconohio.com

Location: Akron, OH

Mamacita's

Contact:

(Phone) 330-552-3040

Location: Kent, OH

Federales:

Contact 330-593-5021

Location: Kent, OH

San Miguel:

Contact: 330 535 4004

Location: Akron, OH

Dahlia coffee Co:

Contact: 216-800-1266

Location: Cleveland, OH

Interview Format[s]:

IN PERSON:

-In person if possible; once in person I will let them know the interview is to be recorded for later use.

-Disclose this information is not for governmental use or documentation

OVER THE PHONE:

-A simple recorded phone call that would be later broken down into anecdotes for later use.

Storytelling:

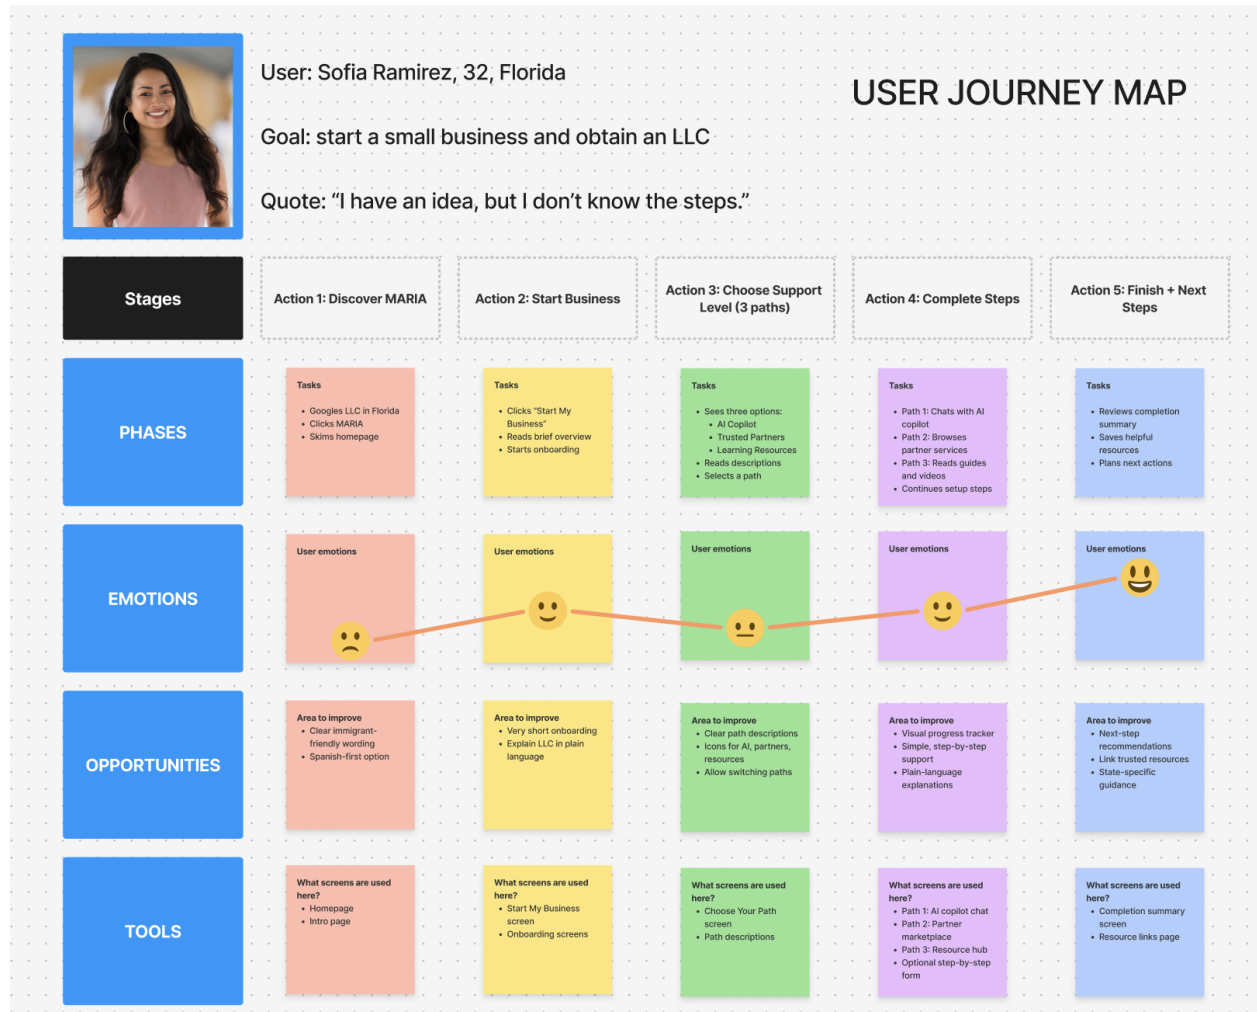

For the user journey I was thinking of a "Hear from other business owners" and you'll be able to click through the anecdotes and snippets of the interviews of the other small businesses.

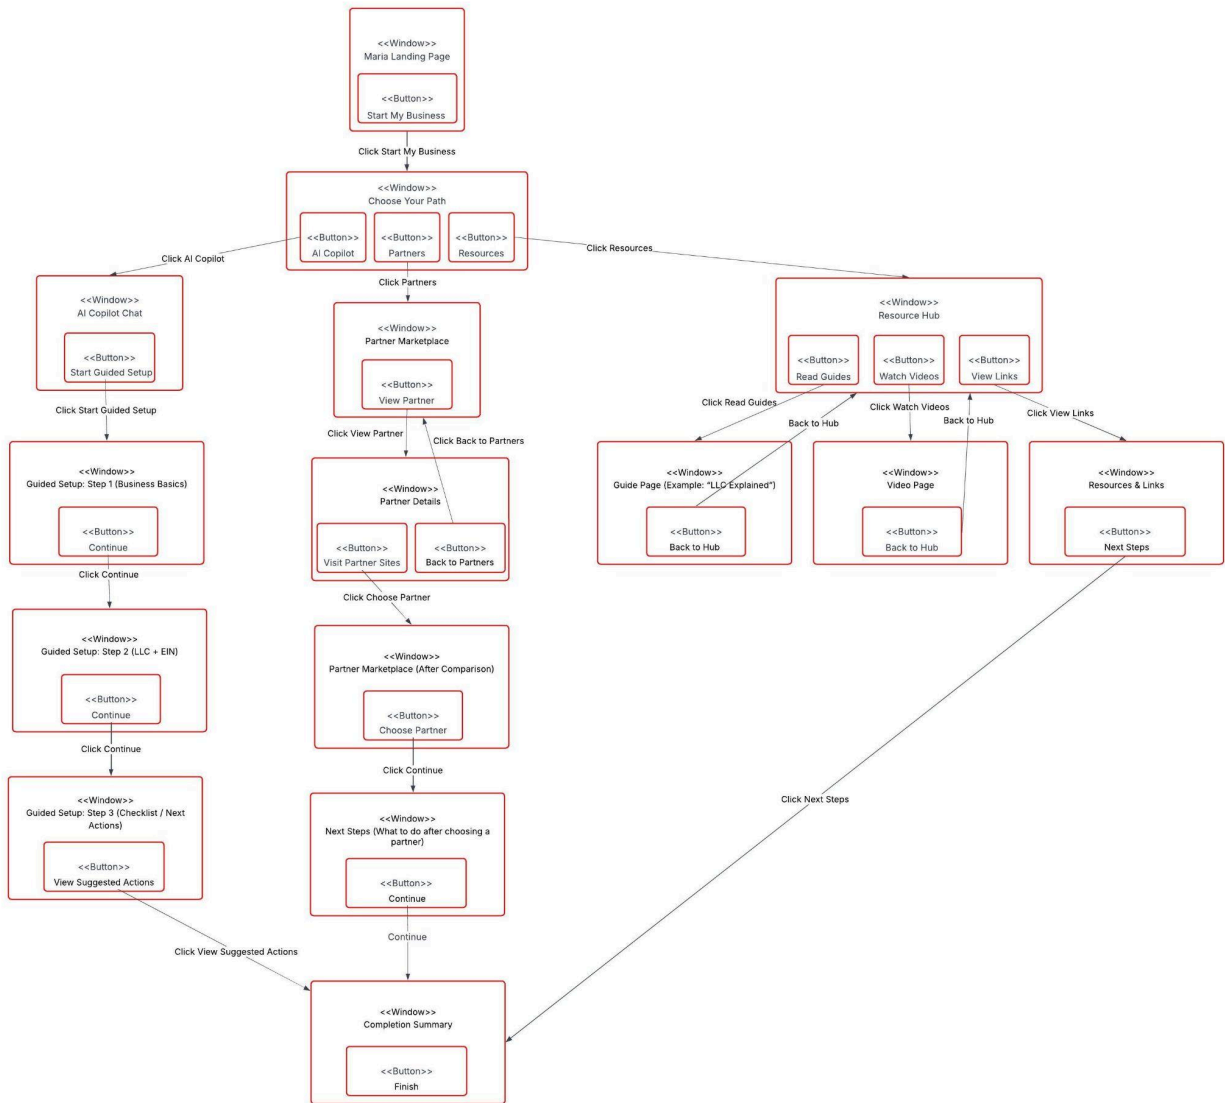

OG Journey and network diagram

User Journey Mapping: What is it & How to do it | Figma

What is User Journey Mapping? Definition, Guide & Examples

<https://www.figma.com/board/gCLNRCdLvp5jdzKo3DbXW/Customer-Journey-Map--Community-?node-id=0-1&t=DgO7dBSMUM12QTKs-1>

Questions for Kate

1. Can you elaborate more on the three pathways
 - a. As well as how the AI integrates into each pathway
2. Can we get the results from your survey
3. Is there someone on your team of people helping you that could also help us answer these questions
- 4.

Feedback meeting with Kate - Sprint 1

Meeting with Kate 2

We are looking to work with the colors Yellow and Blue. Let us start with these colors and work with different gradients and variations of it.

The fonts Joey shared, look good for now. Let us begin our design with those fonts.

Information about the pathways

The first pathway is the AI copilot - a step-by-step guide using AI

The second pathway is connecting to partners who can help people setup the business A-Z

The third pathway is the educational resources.

There will be another option for people who are confused about which pathway is the best for them. It will be a questionnaire and based on the user's responses, it will recommend a path for them.

User Journey Map

We are good to proceed with the current User Journey Map template.

Jorge will share the photograph of the workflow that we built for the prototype with Kate.

Feedback meeting with Kate - Sprint 2

Feedback 2

The colors are good to go but we just need to make them brighter.

Kate is still in the process of choosing the final name for the website - she will let us know if there is an update.

It was also proposed to meet with the developer that Kate is in touch with. That would be good for us to understand from the development side of the project.

The Save on the pathway cards can be changed as there might not be any need to save the data on this page for the 2 pathways and we can just add the save option for the copilot once it has already been selected.

Kate likes the logo on the top corner and she would like it to remain as the name of the website and not any icon logo.

She will also provide us resources for the educational resource pathway and the api information for connecting with the partners. She also would like us to add certain banks. Additionally, she would not like to directly add names of the partners. - already provided

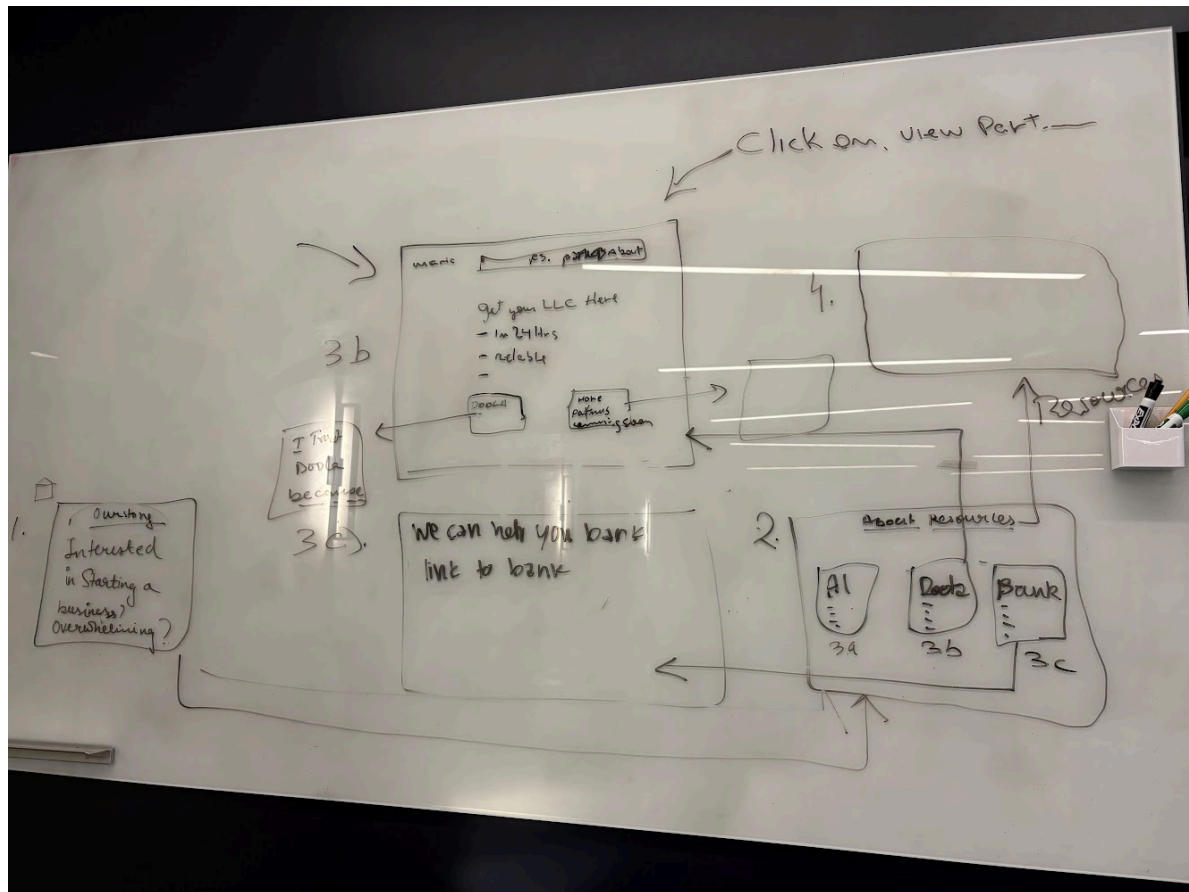

On the second screen - on the connect with a partner pathway -

- Try to make it as clear to the user as possible that this pathway leads directly to connecting with external agencies. Ex - if you want to establish an LLC with our trusted partners.

On the first screen - add information about the LLC. Add some information that can immediately catch the user's attention. Ex - Get your LLC in 24 hours. A fast, reliable, smooth process and once they decide on getting an LLC - take them straight to Doola. - this pathway has changed

There have been changes in the pathways, screen order and the home page. Reference the image.

(Photo on the next page)

Information from Kate

API information

This link also contains links to videos for the educational resources section.
Kate will keep updating this link with more resources.

Meeting with Kate and Development
team

Feedback -

1. Would like the home page information to be more concise and clear. If it could be bullets, or just one line conveying what we do.
It could also be more visual. Reference - LegalZoom
That could be in place of What is Project Maria.
- 2.

Draft Usability Testing Questions

Highlighted = tasks

1. You just landed on this website for the first time. Tell me what you think this website helps people do.
2. You want to get into the process of establishing your LLC directly, Find the path to starting your LLC.
3. You want to learn more information about starting your own business. Where would you go for that?
4. Imagine you have a quick question about starting an LLC. Which support can you use to get an answer?
5. If you want to set up a business bank account, where/what would you click?
6. If you wanted to switch the language from english to spanish or vice versa, where would you click?
7. Do you think you have a positive feeling about this platform when you use it? Do you really want to get your LLC with us? Would this platform help you?
8. Which section of the platform looks the best to you, which is most organized?
9. Was the home page engaging for you?
10. (For Spanish speaking population specifically) - All this you are seeing in English. Is this feeling overwhelming? Are you overwhelmed by the amount of English you are seeing?
 - a. Maybe change to is all of the information too overwhelming, is it easy to understand (open-ended question)
 - b. Is the english version easy enough to understand for someone who does not speak english as a first language

Script Draft for approaching people:

Hi, would you be interested in testing our website real quick?

Yes

Okay perfect, we have a list of questions and all you have to do is give us your best answer!

(let them answer the questions individually)

Once they are finished, we can ask them how difficult it was for them, if at all

To finish, we can ask them if they have any feedback that would benefit the website

Script:

Hello, can you help us test our website

Okay I will start by having you scan this code for the questionnaire. I will have you start by answering the first two questions of name (if you would like) and native language. There will be a scale to complete after each task, do not move on until you have finished the task.

I will have you start by answering the first open-ended question on the questionnaire after just looking at the home page.

Okay now for the first task, can you find where you would start the process of creating an LLC, then complete the scale on the questionnaire

For the second task, can you find where you would go to learn more about starting a business, then complete the scale on the questionnaire

For the third task, can you find where you would go to open a business bank account, then complete the scale on the questionnaire

For the fourth task, can you find how you would switch the site from English to Spanish or Spanish to English.

Now can you please explain how the information on the website feels, is it easy to understand, or was it overwhelming at any point

Lastly, can you please explain if you felt confident using this platform, and if you would consider using it to start your LLC.

If there is anything else you would like us to know about please feel free to include that as well.

Thank you so much for your time, we appreciate your thoughts

1. You just landed on this website—what do you think it helps people do?
2. Find how you would start the process of creating an LLC.
3. Find where you would go to learn more about starting a business.
4. Find how you would open a business bank account.
5. Show how you would switch the site from English to Spanish.
6. How did the language on the site feel—easy to understand or overwhelming at any point?
7. Do you feel confident using this platform, and would you consider using it to start your LLC?

How did the information on the site feel—easy?	Do you feel confident using this platform, and why?	Do you have any other suggestions?
Easy to understand. Balanced text.	I think so.	Contact us info if it matters.
I felt everything was easy and approachable. Non-	I would! I really enjoy the layout. The flow is natur	I think it's a great start! The only thing I would change would be on the partners page the yellow text on the green background is a little difficult to read.
Easy to understand	Yes so confident	
Easy	Yes, look trustable.	No
Easy to understand	Yes I would the layout is user friendly!	No
Easy to understand	Yes	Na
Easy to understand	Yes	Not at this moment
Easy to understand	I felt confident, yes I would	
No, the site was easy to use	Yes, I would	The title font on the Home Tab could be smaller. Yellow color may cause visual effects for some users and should be replaced with a more neutral color.
Easy	Yes	

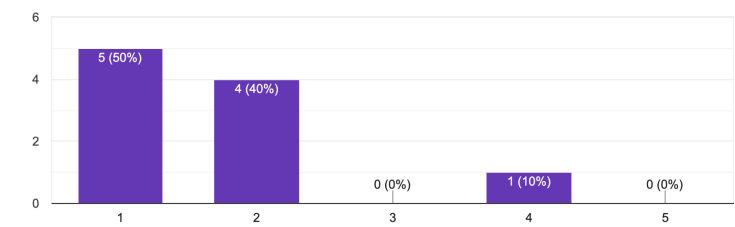

Task 1 - Find how you would start the process of creating an LLC. Question - The task was easy to accomplish
10 responses

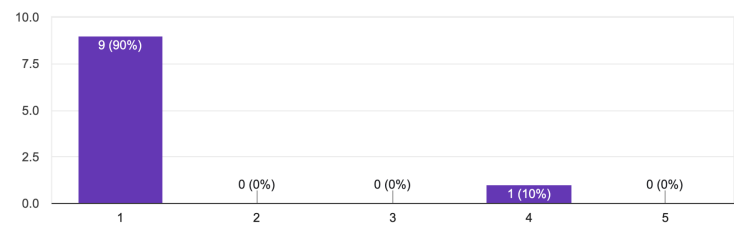

Task 2 - Find where you would go to learn more about starting a business. Question - The task was easy to accomplish
10 responses

Task 3 - If you want to set up a business bank account, where/what would you click? Question - The task was easy to accomplish
10 responses

Task 4 - Show how you would switch the site from English to Spanish. Question - The task was easy to accomplish
10 responses

From testing results our main takeaways were:

1. Add in some kind of hotline/connection to kate or business email (email, number, etc)
2. Some of the yellow on green coloring was difficult to read
3. Maybe move the banking section to its own page so it is easier to find.

Tester 1

Tester 1 -

The tester was easily accomplishing all the tasks.

She was easily able to identify what the purpose of the website was for.

She felt the text was very balanced with a healthy amount of information. It did not feel overwhelming at all.

Feedback -

Contact Information (if relevant) - like some kind of email id.

She feels we are really on point with limited text.

She really loved the design aspects - the colors and the font.

Tester 2

Tester 2:

Suggestions:

Add a separate button for the create a business bank account

Thoughts and feelings:

- Colors are inviting
- Very straight forward
- Feels helpful engaging and trustworthy
- Minimal but not boring
- Feels approachable

The tester easily got through the tasks, but struggled slightly to find the business bank account part. Suggested that we should maybe add something to make it more clear where exactly that is.

Tester 3

* In Task 2, it wasn't easy for him to find the resources because the top bar is very small.

Suggestion:

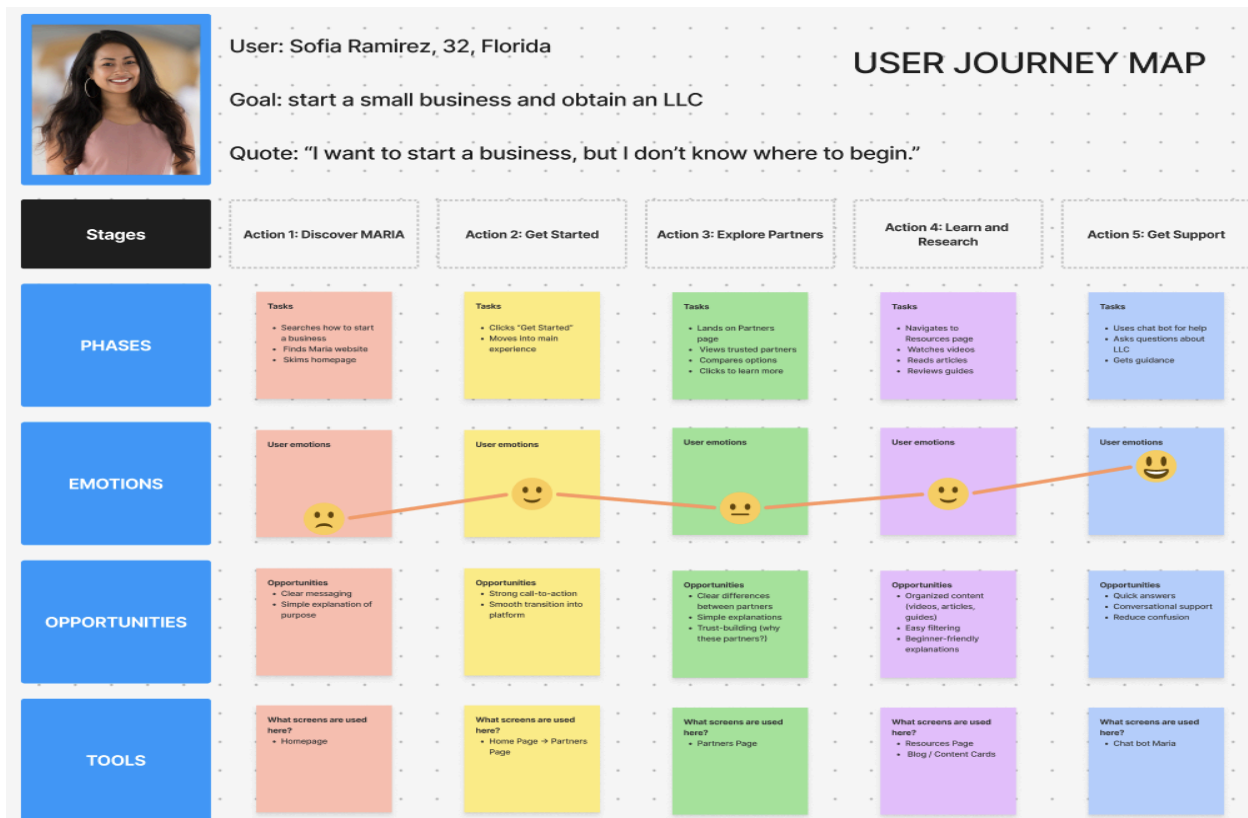

* He suggested that it might be helpful to include information about what an LLC is on the homepage.

Comments:

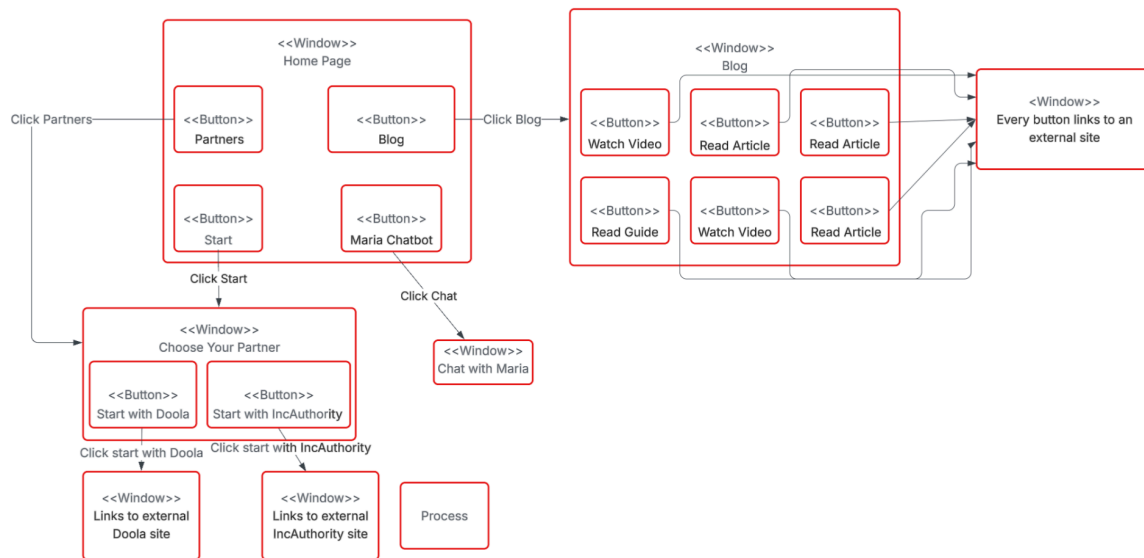

The page was easy to navigate and not overwhelming.

Webpage iterations

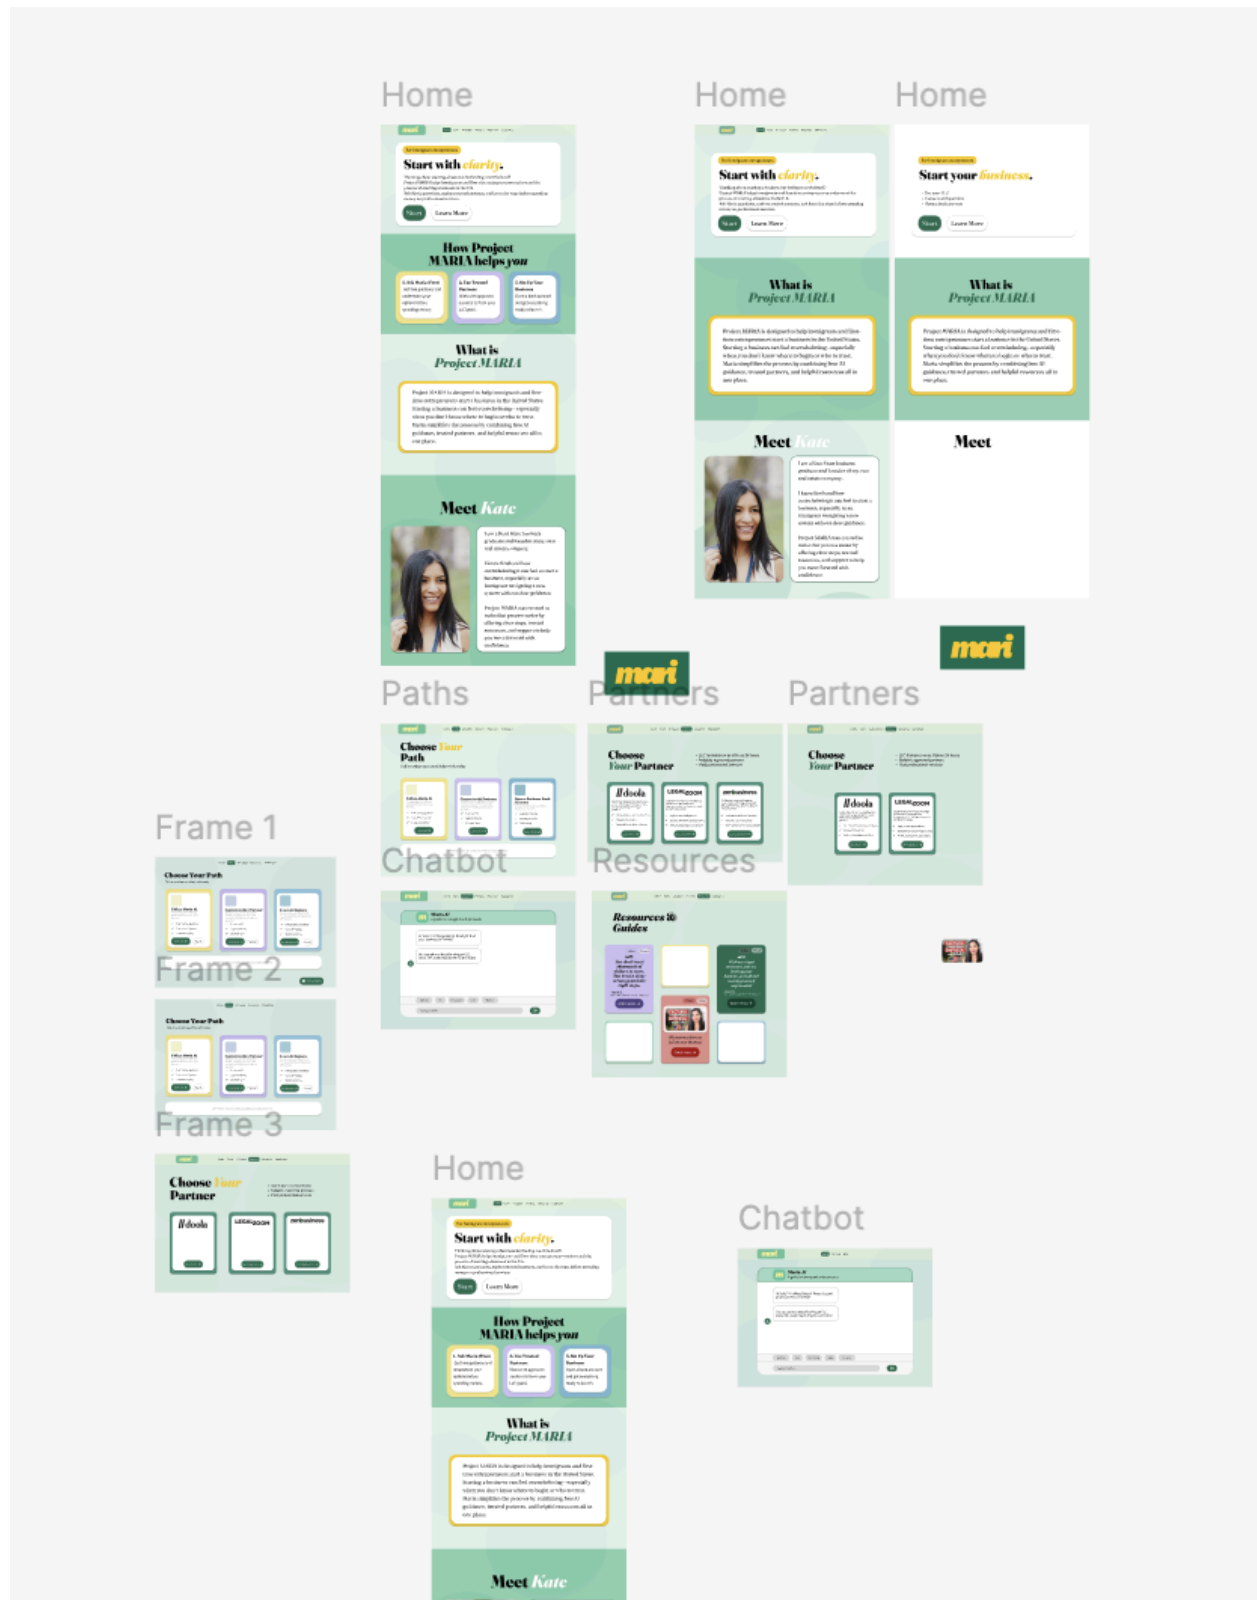

<https://www.figma.com/design/OwfoBKM5AxAVA35wd1lkEQ/Project-Maria?node-id=0-1&t=NrdxMrG5CjtAY7g-1>

First iteration (feb 20):

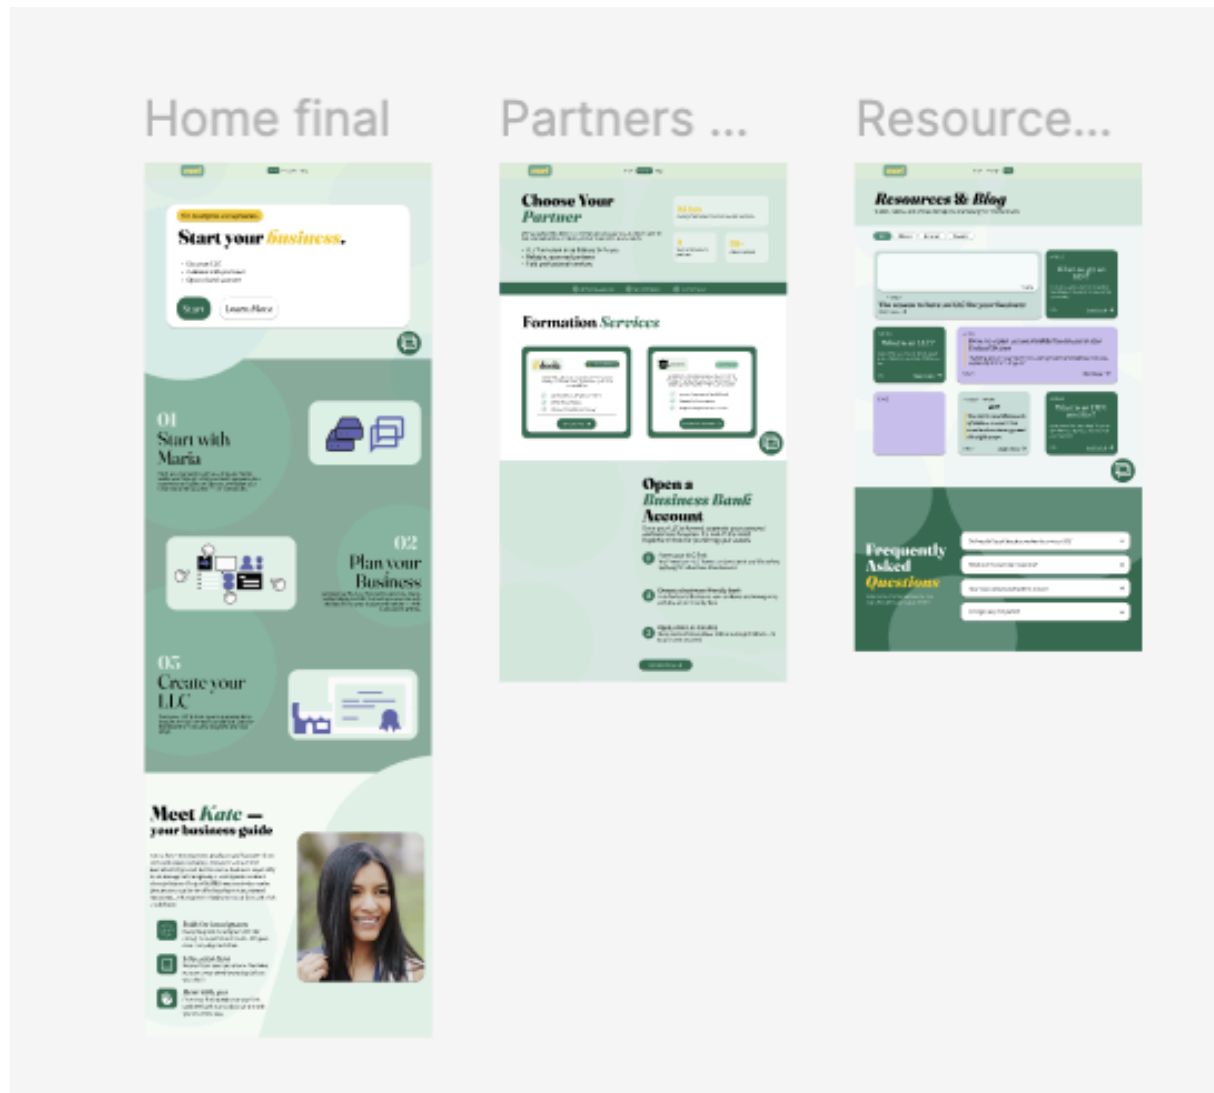

Mainly focusing on the home page and choose your route, exploring colors

Second iteration (march 20):

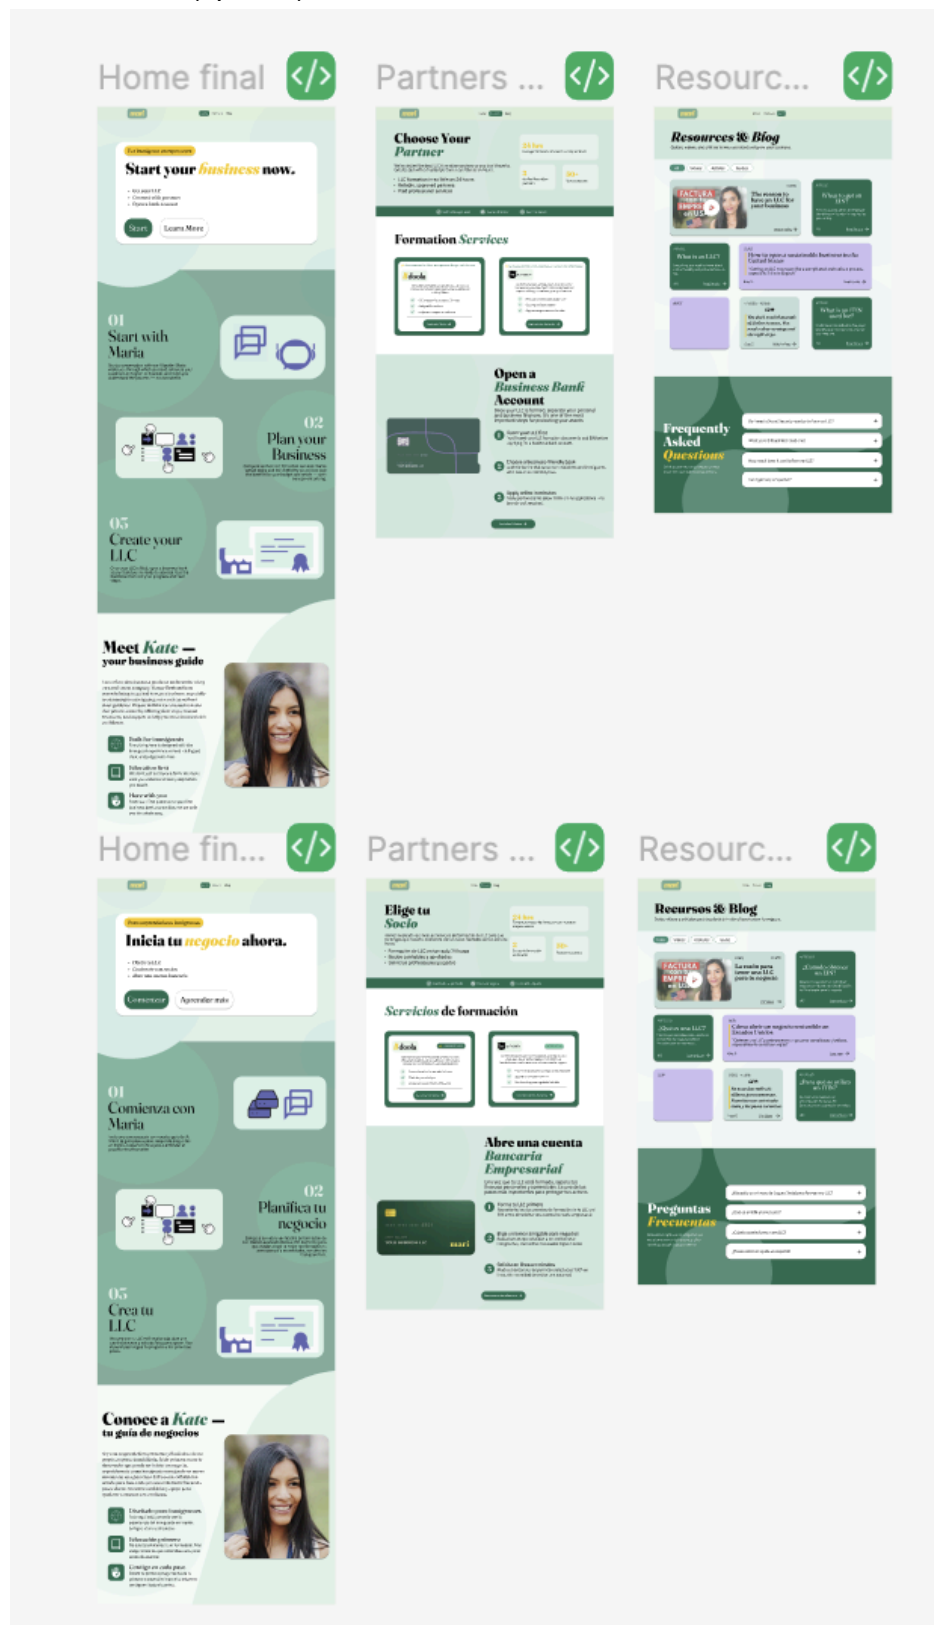

Making a full webpage, focusing more on the partners

Third iteration (march 31):

Getting the final layout and idea down, just exploring colors and aesthetics

Final iteration (april 10):

Very similar to the last one, focusing on the english and spanish accessibility
